Jauer Dependable Genetics

31059 Juniper Ave. • Hinton, IA 51024

Semen Catalog

Your Source for Maternally Efficient, Low Input Foraging Genetics to Combat Today's High Costs

For the past 4 decades, Jauer Dependable Genetics have developed Angus cattle that will perform in all segments of the beef industry. Our goal is to produce trouble free genetics that work in the real world. By selecting for cattle that do more for less, offspring from Jauer bulls will have the low birth, low maintenance, maternally efficient genetics that are ideal to combat today's high cost of production. It is a philosophy that has led to success today and will continue to do so in the future.

Our program emphasizes least-cost production, and the fleshing ability of our cattle is bred in - not fed on. Our extensive use of line breeding allows the consistency and dependability of Jauer Genetics to be exhibited generation after generation. The Jauer cow herd is filled with females that are deep, thick, easy fleshing, and versatile. Their moderate frame makes them ideal as a building block for an F-1 program or the foundation for a purebred seed-stock program.

The herd sires in this catalog have been utilized in our program with exceptional results. They represent years of testing and have proven themselves through times of drought and tough conditions. Feel free to contact us for any information that can assist you in your selection process.

- Semen \$20/unit, Certificates \$35
- Jauer Honesty 726 1020 is the most consistent low birth weight bull we have ever raised. His calves are vigorous at birth and extremely consistent. We intend to duplicate his dam's great udder development and her ability to thrive in grass environments into maternally strong heifer replacements. The daughters of Jauer 1020 look just like his dam, the Jauer Exodus 726 cow.
